Passionate in Java Full Stack Development with 2 years of experience in Java, Spring Boot, Hibernate, Angular and Restful Web Services by predominantly developing web applications and backend systems. Skilled at writing clear, concise code that is easy to maintain and troubleshoot.

WORK EXPERIENCE

Software Engineer
FIS

06/2021 - Present   *Chennai, TamilNadu*

FIS is a leader in technology and services that helps businesses and communities thrive by advancing commerce and the financial world.

Achievements/Tasks

- Developed an in-house tool to support parallel test execution and orchestration using a containerized platform. **Results:** Over 70% reduced costs in the test and maintenance environment.
- Worked in agile framework, collaborating with business and research teams in story grooming, reviewing story/acceptance criteria and performance metrics.
- Worked on the Fraud Finder Account Takeover Fraud product that detects fraudulent customers by verifying their address, social security number, etc. by transacting through the user interface, API and MQ channels.
- Gained some knowledge in working on ID Verification and Address Analysis applications of Banking Domain.
- Developed and worked in writing testable, scalable and efficient code for handling API requests and response information from another end.
- Capable of developing and maintaining automated testing using the keyword driven testing framework.
- Worked with technical leads and other team members to ensure 100% on-time delivery in every sprint.

EDUCATION

B.Tech Information Technology
Hindusthan College of Engineering and Technology

07/2017 - 04/2021   *Coimbatore, TamilNadu GPA - 9.17/10.0*
